2. Tools and equipment for civil engineering	4
2.1 Diamond core drilling bits "Type 2000"	4
2.2 Diamond core drilling bits "Type 8000"	5
2.3 Diamond core drilling bits "Type 5001"	6
2.4 Diamond core drilling bits "Type ASPHALT"	7
2.5 Additional equipment	8
3. Extendable drilling systems for civil engineering.....	10
4. Mining tools	12
4.1 Surface setted diamond bits	12
4.2 Diamond impregnated bits	18
4.3 Stratacut bits.....	23
4.4 Synset bits	23
4.5 Diamond hole openers.....	24
4.6 Diamond reaming shells	24
4.7 TC bits, TC reaming shells and borit bits	26
4.8 Drill recommendations	30
4.8.1 Spindel speed	30
4.8.2 Flushing water recommendations.....	30
4.8.3 Weight on bits	31
4.9 Associated equipment	32
4.9.1 Core barrels.....	32
4.9.2 Liner conversion kits	32
4.9.3 Casing tubes	32
4.9.4 Wireline drill rods	32
4.9.5 Drill rods	32
5. Tools for oil and gas drilling	33
5.1 Core drilling bits	33
5.2 Non coring bits	34

1. Introduction to the company

factory in Adelheidsdorf/Celle

Dieckmann Diamond Drilling Tools Ltd. was established in 1974 to manufacture drilling tools for the oilfield-, mining- and civil engineering industries.

Diamond drilling bits, coring bits setted with natural and synthetic diamonds, and associated equipment.

A wholly german owned company, all its products are manufactured in the federal republic of germany.

The company employs highly experienced manufacturing and design personnel, is innovative and offers the personal service that larger producers find difficult to maintain.

The factory is situated at Adelheidsdorf/Celle, the centre of the german oil drilling industry, has 2.500 sq.m. production area. The machining capacity including CNC lathes and CNC milling machines, electric furnaces for temperatures up to 1.400°C, with conventional or atmosphere control and sintering machines.

The design department using the latest CAD system, is able to react quickly to the unusual requirements of the drilling industry.
